

NOW MORE REALLY DOES MEAN LESS

Using Genuine Allison High Capacity Filters along with Allison Approved TES 295 transmission fluid can extend filter change intervals in most applications. Which means even less routine maintenance for your Allison Automatic and more savings for you.

LONGER LASTING, BETTER PROTECTION

For years, Genuine Allison Filters have been the benchmark for providing longer life and better filtration; Genuine Allison High Capacity Filters have significantly raised the mark. Developed and tested in some of the most severe transit applications on the planet, Genuine Allison High Capacity Filters perform.

When used with Allison Approved TES 295 transmission fluid, these filters prolong the fluid life up to 300,000 miles in general duty applications. And, in severe applications, the combination of TES 295 fluid and Genuine Allison High Capacity Filters provides a 50% improvement in fluid change intervals.

OUR EXPERIENCE WORKING FOR YOU

Particle holding capacity along with advances in filter media gives Genuine Allison High Capacity Filters incomparable advantages over competitive offerings. But, you don't need a microscope to see what makes Genuine Allison High Capacity Filters better. It's printed right on the package. We call it our logo. And it's your sign that you've got a filter with years of transmission experience behind it. Experience that provides the best combination of protection and service for your Allison Automatic.

Genuine Allison High Capacity Filters, like all of our Genuine Allison parts, are available exclusively at authorized Allison Transmission Distributors, Service Dealers and Allison Express Lube Dealers. To find one near you, visit www.allisontransmission.com.

MORE FILTER CAPACITY MEANS MORE VALUE IN THE LONG RUN

FILTER CAPACITY COMPARISON*

Genuine Allison High Capacity Filters for Allison 3000/4000 Series transmissions are designed to hold more material and keep flow rates within defined specifications longer.

Reduction in flow from a clogged non-Genuine Allison filter can result in poor performance or damage to the transmission.

Using Genuine Allison High Capacity Filters results in longer drain intervals, less downtime and even greater productivity for your Allison Automatic equipped vehicles.

*Competitors tested: Pall, Donaldson, Fleetguard, CoachGuard, Baldwin, Fram, Filtrec and Sun Filter.
Testing conducted by an independent laboratory using specification similar to aircraft filter testing (MIL-A-8815) with ISO A3 test dust per ISO 16889.
