

Custom Oilfield Generator Houses

Stewart & Stevenson – Longview designs and builds custom generator houses for the oilfield. Because we know that each application is unique, we take the time to consult with each customer and provide equipment that is tailor made to your specific application. We understand that the harsh environment you work in requires rugged and reliable equipment to get the job done.

Stewart & Stevenson – Longview has the expertise necessary to design and build a custom generator house for your drilling operation. Utilizing innovative design features and quality construction, your generator house is built to last for years to come.

Model pictured is a 40' x 12' x 10' Twin Genset House featuring two S-60 gensets, MCC, low voltage transformer, fuel day tank, lighting, Appleton receptacle template, and work/storage room.

Generator houses are available with the following:

- Detroit Diesel S-60 gensets offering 380 kW of prime power
- Sullair air compressors
- Motor Control Center (MCC)
- Motor starters
- Quick Connect coupling for temporary power
- Insulated exhaust system for added safety
- Clear span roof design for added overhead clearance
- Exterior connections for fuel and air lines
- 500 watt halogen lights
- Rig-A-Light
- Appleton plugs and receptacles
- Fuel day tank
- Distribution panels
- Low voltage transformers
- Custom built work/storage rooms
